

Nancy Roth is Senior Watershed Scientist at Tetra Tech's Center for Ecological Sciences in Owings Mills, Maryland. Ms. Roth has a background in stream ecology and brings more than two decades of experience in watershed monitoring, assessment, and restoration planning. She has led and supported a variety of projects as an environmental consultant, most in support of state, local, and federal agencies, including the Chesapeake Bay Program, Maryland Biological Stream Survey, and local governments in Maryland and Virginia. Prior to consulting, Ms. Roth was a Knauss Sea Grant Marine Policy Fellow and Environmental Specialist in the wetlands program at U.S. EPA Headquarters. She began her career as an environmental educator, leading hands-on field experiences for the Chesapeake Bay Foundation. She holds a master's degree from the University of Michigan in Conservation Biology and a bachelor's degree from Carleton College, where she majored in biology and studied marine biology on the West Coast. She lives in Annapolis and likes exploring the Chesapeake by canoe and paddleboard.
